**New High-speed, OEM-ready DAQ boards  
from Measurement Computing**

NORTON, MA. – October 10, 2013 – Measurement Computing Corporation, the value leader in data acquisition, today announced the release of four OEM-ready USB DAQ boards with sampling rates up to 1 MS/s. Starting at only \$799, the USB-2600 Series provides exceptional value for embedded and OEM DAQ applications.

The USB-2600 Series offers up to 64, 16-bit analog inputs, up to four high-speed analog outputs, 24 digital I/O, four event counter inputs, and four timer outputs. The boards also feature header connectors instead of screw terminals, making signal integration easy.

Included software options for the USB-2600 Series include out-of-the-box TracerDAQ® along with comprehensive support for Visual Studio®, Visual Studio® .NET, and NI LabVIEW™.

USB-2600 Series						
Model	Analog Inputs	Sampling Rate	Digital I/O	Analog Outputs	Counter Inputs	Price
USB-2623	16 SE	1 MS/sec	24	0	4	\$799
USB-2627	16 SE	1 MS/sec	24	4	4	\$999
USB-2633	64 SE	1 MS/sec	24	0	4	\$1099
USB-2637	64 SE	1 MS/sec	24	4	4	\$1299

**About Measurement Computing**

Measurement Computing is the market leader in the design, manufacture, and distribution of value-priced data acquisition hardware, and test and measurement software solutions for both programmers and non-programmers. More information about Measurement Computing is available on the Web at [www.mccdaq.com](http://www.mccdaq.com).
