WARNINGS and CAUTIONS. When you see any of these symbols on the product or in the documentation, carefully read the related information and be alert to the possibility of personal injury and/or equipment damage.

To maintain the safety, emission, and immunity standards of this declaration, the following conditions must be met.

- * The host computer must be properly grounded.
- * A protective ESD wrist strap should be used when connecting or disconnecting leads from the screw terminal blocks. Alternatively, unplug the unit from the host computer when making connections.
- * The host computer, peripheral equipment, power sources, and expansion hardware must be CE compliant.
- * Equipment must be operated in a controlled electromagnetic environment as defined by British Standard EN 61326-1:2006, or IEC 61326-1:2005.
- * I/O cables must be less than 3 meters (9.75 feet) in length and shielded.
- * If external DC power is needed, then a TR-2E power supply must be used.

Not for use with signal levels exceeding the rated limits.
