Dear Customer:

I would like to take a moment and let you know of upcoming changes that affect purchasing of MCC brand products.

As you may be aware, Measurement Computing Corporation (MCC) merged with Digilent in 2021. This merger will give us improved manufacturing capabilities, additional inventory, and a better overall buying experience for all our valued customers.

In an effort to improve operational efficiency, effective 1/1/2023, MCC order processing will be processed within the Digilent ERP system. Therefore, purchase orders placed for MCC products should be referenced to Digilent with Digilent Part Numbers. Digilent's account and banking information can be found below.

The new Digilent Part Numbers can be found along with the MCC PN on mccdaq.com. As an example, below is a screen shot of the mccdaq.com that lists the historical MCC PN (USB-2523) and the new Digilent PN (6069-410-184).

PART NUMBER	DESCRIPTION
USB-2523 SKU: 6069-410-184	DAQ device with 16 SE/8 DIFF analog inputs (4 channels can be configured as thermocouple inputs), 16-bit resolution, 1 MS/s sample rate, 24 digital I/O, and 4 counter inputs

We have worked hard to make this transition easy for our valued customers. The same Customer Service, Sales and Support staff are here to assist you. To make the transition process easier for you, we are maintaining the current MCC contact/email addresses.

We look forward to working with you during this transition. You should continue to expect superior service from us. If you have any problems or concerns, please do not hesitate to contact us.

Sincerely,

A handwritten signature in blue ink, appearing to read 'B. Kennedy'.

Bill Kennedy
VP, Operations
Measurement Computing Corporation/Digilent
