New DAQami Version 2.0 Advanced Data Logging Software from Measurement Computing

NORTON, MA. – September 16, 2015 – Measurement Computing Corporation (MCC) today announced the release of DAQami version 2.0. DAQami is an easy-to-use data logging software application compatible with most DAQ devices from MCC.

DAQami allows users to display and log data, review data, and export data to programs like Microsoft® Excel or MATLAB®. Users can quickly configure acquisition and channel options and choose from a variety of data displays.

New features in version 2.0 include support for digital and counter inputs, the ability to review acquired data during an acquisition, and support for additional MCC DAQ devices.

DAQami is available for only \$49 when purchased with MCC DAQ hardware and is supported under Microsoft® Windows 10/8/7/Vista® operating systems.

For complete information on DAQami including a list of supported USB and Ethernet DAQ devices, visit: www.mccdaq.com/DAQami

About Measurement Computing

Measurement Computing designs and manufactures data acquisition devices that are easy to use, easy to integrate, and easy to support. Included software options are extensive and provided for both programmers and non-programmers. Free technical support, one-year limited warranty, and low cost of ownership make Measurement Computing the easiest choice for DAQ.

More information about Measurement Computing is available at www.mccdaq.com.
