**New Hand-held Temperature and Humidity Data Loggers
from Measurement Computing**

NORTON, MA. – October 18, 2013 – Measurement Computing Corporation, the value leader in data acquisition, today announced the release of three hand-held, stand-alone data loggers for portable temperature and humidity recording. The USB-600 Series start at only \$135 and feature an LCD screen with real time data as well as onboard memory to log up to 250 K readings.

The USB-600 Series are ideal for portable data logging for short or extended periods of time. Each module is battery powered and includes push button controls, audible and on-screen alarms, and logging rates from 2 seconds to 2 hours. The USB-601 logs temperature data, the USB-602 logs temperature and humidity data, and the USB-603 has the ability to log two thermocouple channels.

Included, easy-to-use software lets users configure the logger, set up alarms and start and stop times, and display logged data onto a PC for analysis and export to Microsoft® Excel®.

USB-600 Series Comparison Chart					
MODEL	Channels	Measurement Type	Temperature Measurement Range	Sample Rate	Memory
USB-601	1	Temperature	-30 °C to 80 °C	10 sec to 2 hrs	250 K readings
USB-602	2	Temperature, Humidity	-30 °C to 80 °C	10 sec to 2 hrs	250 K readings
USB-603	2	Thermocouple	Thermocouple-Dependent	2 sec to 2 hrs	250 K readings

About Measurement Computing

Measurement Computing is the market leader in the design, manufacture, and distribution of value-priced data acquisition hardware, and test and measurement software solutions for both programmers and non-programmers. More information about Measurement Computing is available on the Web at www.mccdaq.com.
